EDUCATION

ZAGAZIG UNIVERSITY   *May 2024*

Faculty of Engineering (Computer Science department)

PROJECTS

- **Dashboard:** This is a tutorial with **Reactjs**. It is a complete dashboard which contain pages like customers, employees and apps like calendar and text editor and charts like line, area and Pyramid I use Tailwind to style all the components and with Syncfusion , it is very simple to make all of these components with only ten lines of code for every component .   GitHub Repo , Live Demo

- **GYM Website:** This is a tutorial with **Reactjs**. It is your fitness club , you can find any exercise and how you can do it .Here i use Rapid API and MaterialUI GitHub Repo , Live Demo

- **Ecommerce Website:** This is a tutorial with **nextjs** and Sanity. With Sanity, you can update any item in the page without coding , only by the website of Sanity ,you will able to see every product and you can modify it easily. I use Stripe for payment. GitHub Repo , Live Demo

- **Your Notes: MERN** Stack project which everyone can register, login, add his tasks, check them for completed, modify his account and logout. Frontend Repo , Backend Repo

ADDITIONAL SKILLS

- Graphic Designer with illustrator & Photoshop.
- Good in English.
- Voluntary work: Graphic designer for ZagEng Family at my faculty.
